

# Odoo

Available

 Client Integration - VoIPcube client mandatory

## Introduction

Provides a call popup to the end-user with matched contacts. Will show multiple hits and provides a deeplink to the contact page.

Call pop up produced by the Odoo integration

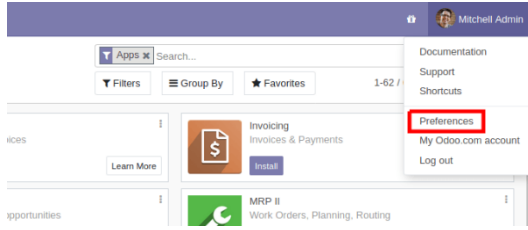

## Configuration

To configure the Odoo integration we need to following information:

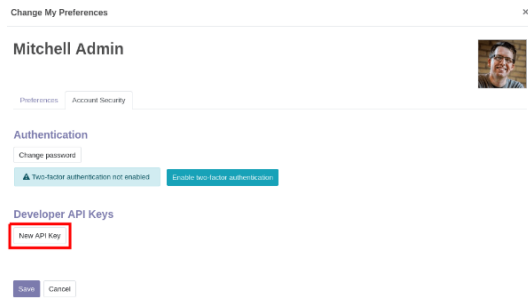

- Domain name
- Username of a administrative account
- API Key

### Get an API key

- go to Preferences

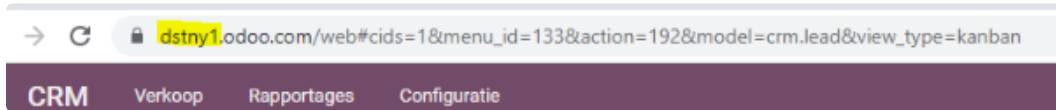

- Go to Account Security and click > New API Key

Store the key somewhere safe

## Get the Domain

The domain can be found in the Odoo URL

In this case the domain value = dstny1

## Assignment

Assign the integration in VoIPcube and fill the values. password = API Key
